Stop Drunk Driving!

As the year is coming to a close, many of us are out enjoying Christmas parties, year-end parties and more. While everyone wants to have a good time, everyone deserves to make it home safely! In this month's Obihiro Pioneer, we will go over some of Japan's laws on drinking (alcohol) and driving, as well as some things to keep in mind when you decide to go out.

It only takes one drink

Generally, one's blood alcohol concentration will be determined by a breathalyzer. If you caught with a reading of .15 mg or more while driving, you are considered to be drunk driving 飲酒運転 *inshu unten*. But just how much is .15 mg? According to the Health and Medicine of Alcohol Association, the average male adult (weighing about 60 kg) after drinking a bottle of beer (500ml) can end up having as much as .2 mg of alcohol! There are many more factors that go into how much alcohol is in one's system, but better safe than sorry!

You can "drive" a bicycle

While it doesn't have an engine, a bicycle is considered a vehicle. Therefore using a bicycle while under the influence of alcohol is also illegal. Depending on how much alcohol is found in the rider and location (each

jurisdiction enforces differently) there are cases of having to pay fines and even getting their driver's license revoked!

"Taxis are so expensive!"

But not nearly as much the fees associated with drunk driving! For the least severe case (driving under the influence 酒気帯び運転 *shuki obi unten*) can be as high as 500,000 yen! That's on top of points taken off of your license and fees from remedial classes necessary to get your license back. For a more severe case (driving while intoxicated 酒酔い *sake yoi unten*) the fine can get as high as 1,000,000 yen!

"But I drove to the bar!"

Leaving your car and taking a taxi may not be an option for some. This is where 代行 *daikou* is your best bet. After calling a *daikou* service, they will send out a car with 2 drivers to your location. Much like a taxi, they will drive you home but using your car! The *daikou* service car will follow your car until you and your car get home safely. Generally this service isn't much more expensive than a taxi ride home, and you don't have to pick up your car the next day!

Enjoy the last few weeks of 2017, but stay safe!

Don't Get Sick, Get the Shot!

The temperatures drop as we move deeper into winter. To shelter ourselves from the cold, many of us stay indoors much longer than in the summer. This leads to a higher chance of catching the cold, or worse, getting the flu. Let's make the most of the winter by taking some preventative actions from getting sick!

Wash your hands frequently

Simple, but effective is to keep your hands clean! Everyone uses their hands to touch everything. Thoroughly washing your hands after using the restroom, sneezing, etc. will help prevent the spread of the flu virus.

Get quality sleep

It's easy to stay in your nice and warm bed all day, but if your room is too cold, you won't be able to fall asleep very easily. Invest in an electric blanket, wear extra clothes, take a hot shower, to help you

get to sleep faster this winter. Getting a good 7-8 hours of sleep a night will help one from getting sick anytime of the year.

Get the shot

By shot, we mean the preventative influenza shot インフルエンザ予防接種 *infuruenza yobou sesshu*. The standard flu shot will cost around 2000~3000 yen. There are discounts for senior citizens (age 65 and over), high-risk individuals between the ages of 60 and 65, and middle school 3rd and high school 3rd year students. Please inquire your town's health department for details.

Here in Hokkaido, winter can make up the majority of the year. Keep happy and healthy throughout the year!
